COMTÜR
EXCLUSIVE DOORS

RESIDENTIAL BUILDINGS + VILLAS

Project: Christ, Freudenberg | Architect: Architektur-Atelier Christ, Limburg | Design: floor-to-ceiling, flush elements with concealed frame system.

If an architect builds his own house, above all he would like to realize his ideas without limitations. With the floor-to-ceiling flush hung elements by ComTür this has been accomplished. Elements designed flush with the wall originate from the interaction of the "FLAT" frame system integrated into the wall; the concealed hinges and roses flush with the door leaf. The elegant dark grey special tone DB 703 was perfectly integrated into the interior concept. „Good to know that ComTür has a suitable door system solution for every architectural requirement“, said the executive architect.

RESIDENTIAL BUILDINGS + VILLAS

Project: Götz, Weilheim | Planning: Schreinerei Faustmann, Weilheim | Design: flush hung, classic panel door VIENNA, matching entrance door.

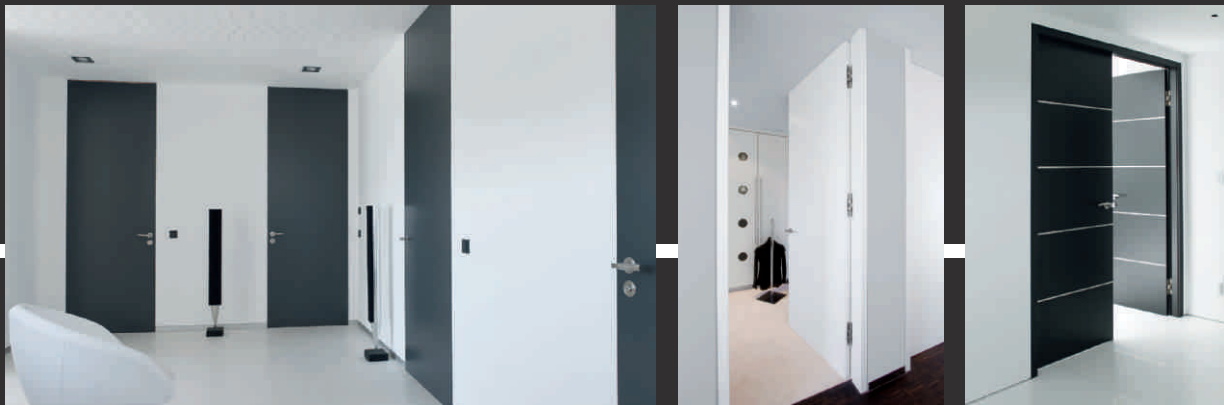

For the developers of an exclusive residential house in Weilheim it was an absolute requirement to design the exterior entrance door as well as all interior doors consistent in an old-German character. Different ideas, based on the passive energy house standard, were drafted for the exterior door and a large custom walnut double entrance door was constructed. Traditional and classic interior doors from the ComTür line "Tradition + Denkmal" perfect the elegant living. All together thirty high-quality elements in a white rubbed lacquer finish were installed.

OLD + HISTORIC BUILDINGS

Project: Luxury villa at the lake Luganersee | Planning: BaurWohnFaszination GmbH, Höchenschwand | Design: expressive traditional door LUGANO.

The new door line LUGANO united craftsmanship and interior design in its nicest form. In cooperation with the BaurWohnFaszination GmbH these traditional style elements, suitable to the high-quality interior design, were developed in the most different variations. A special highlight is the valuable surface treatment: The white rubbed lacquer finish with gloss effect and fine golden pin stripping, stained and patinated European cherry veneer.

HOTELS

Project: Hotel Restaurant Kaiser, Schriesheim | Architect: mmf-Architekten, Heidelberg | Design: 60 functional doors with design veneer.

Historical building meets elegant design. The historical building of the Hotel Restaurant Kaiser belongs to the stateliest timber-framed buildings in the Palatine city of Schriesheim. With the renovation the aim was to integrate high-quality materials and elegant wood into the historical structural fabric to give an unmistakable charm and character to the hotel. ComTür supported the developer with different door solutions. Thus hotel room doors as well as the double door at the restaurant and the entrance door received a constant valency in optics and design.

PRIVATE + PUBLIC PROJECTS

Project: Senior citizen services, Oedheim | Architect: Werner Holzwarth, Heilbronn | Design: Fire protection and sound proofing elements, barrier-free.

Feels like home. This is the philosophy of the Schönberg nursing and senior citizen's services. Therefore, the doors should serve not only as a purely functional element, but contribute to the homey creation. Different surfaces and design variations have originated from the close collaboration with the architect contribute to this aim.
